

Abstract

Device for transferring lollipops provided with a stick, including a transferrer, a first conveyor for supply of the lollipops to the transferrer and a second conveyor for discharge of the lollipops from the transferrer, wherein the first conveyor and the second conveyor comprise series of lollipop holders
5 provided with first and second lollipop clamps, respectively, disposed on a first and a second conveyor line, respectively, such as a chain, to keep the lollipops, in particular the sticks, in a first orientation and a second orientation, respectively, wherein the first and second orientations are at an angle to each other, and wherein the transferrer is provided with third lollipop
10 clamps and a holder for them, wherein the holder is disposed for moving the third lollipop clamps from a position for taking over the lollipops supplied by the first conveyor in the first orientation to a position for discharge of the lollipops in the second orientation to the second conveyor. The first, second and/or third lollipop clamps can be designed for clamping the sticks of the
15 lollipops.
